

## Tel-Instrument Electronics Corp. Reports Selection of the SDR-OMNI Test Set by AIRBUS

East Rutherford, NJ – June 12, 2024 – Tel-Instrument Electronics Corp. (“Tel-Instrument,” “TIC,”) (OTCQB: TIKK), a leading designer and manufacturer of avionics test and measurement solutions, reported the receipt of an initial order from Muirhead, our European distributor, for the new “all-in-one” SDR-OMNI flight-line test set. These units will be sold to Airbus for use in their world-wide manufacturing operations.

Mr. Jeffrey O’Hara, Tel-Instrument’s President and CEO commented: “Airbus has spent the last year conducting an in-depth competitive analysis of our new SDR-OMNI test set. We are thrilled that they have selected the SDR-OMNI for use in their worldwide manufacturing operations. The SDR-OMNI will replace several obsolete test sets currently in use. Airbus cited ease of use and test set speed as major factors in their decision. This validates the significant investment TIC has made in this market-leading test set. The SDR-OMNI has also been approved by Boeing and we are in the process of getting it added to their approved vendor list. We are also introducing a GPS simulator app for this test set which will be available this summer. This new multi-purpose test set will allow our customers to replace up to five single-purpose test sets which will generate significant savings in life cycle support and training costs.”

Keywords: Avionics, Airbus, Boeing, Nav/Comm, ATC, IFR 4000, IFR 6000, IFR 3515, AVX-10K, Viavi, Part-43, ELT, TCAS, ADS-B, UAT, VSWR, distance to fault, DME.

### **About Tel-Instrument Electronics Corp.**

Tel-Instrument is a leading designer and manufacturer of avionics test and measurement solutions for the global commercial air transport, general aviation, and government/military aerospace and defense markets. Tel-Instrument provides instruments to test, measure, calibrate, and repair a wide range of airborne navigation and communication equipment.
